

Dear families,

It is with a mixture of sadness and hopefulness that I tell you our outdoor visitation must stop at this time. Through mandatory staff testing, we had an associate test positive for Covid-19, thereby necessitating a stop to visitation. We know the disappointment this will bring and we are so sorry to make this announcement.

The reason for our hopefulness is that we have taken all of the recommended precautions. Our zones are in place, our team is wearing PPE, our systems to prevent the spread of Covid-19 have been proven to work and be effective. The associate was and has been asymptomatic and followed appropriate safety protocols leading up to the testing.

All staff will be tested by June 30<sup>th</sup>. Contact tracing will be done to identify residents who will be tested as a result of this positive associate test. You will be notified if this affects your loved one.

Our primary goal has been, and will continue to be, the safety of our residents and associates. While this is not what any of us wanted, this is a temporary set-back in the fight against Covid-19 and we are prepared!

We will continue to keep you updated as we get additional information.

Thank you for your support,
